1. A method for reporting on strategic intellectual property management utilizing a computer-implemented system, comprising:
  - (a) receiving a plurality of intellectual property identifiers identifying intellectual property;
  - (b) identifying competing activity documentation describing a plurality of competing activities;
  - (c) storing the intellectual property identifiers and the competing activity documentation in memory;
  - (d) correlating the intellectual property identifiers with the competing activity documentation utilizing a processor coupled to the memory; and
  - (e) reporting on the correlation between the intellectual property identifiers with the competing activity documentation utilizing an output device coupled to the processor.
